(54) Title: COMBINE HARVESTER HAVING SPREADER FOR CROP RESIDUES

(57) Abstract: A spreader (5), which is connected to the rear end (3) of a combine harvester (1) for spreading the crop residues (4) existing from a cutter (2) incorporated in the combine harvester behind the spreader across a width (B) that considerably exceeds the width (C) of the combine harvester and the spreader, comprises several spreader wigs (10) pivotally mounted thereon to define the desired spreading width (B). A wind deflector (11; 19) is mounted on said spreader (5) and upon movement of the spreader (5) in the direction of travel (A) it prevents headwinds and/or lateral winds from affecting the distribution of the crop residues (4) across the spreading width (B).
